

Course Overview

Let's learn something!

**Please watch
this entire lecture!**

Django Bootcamp

- General Course Information
- How to get the course notes and files
- How to get help during the course

Django Bootcamp

- Huge thank you for enrolling!
- Let's discuss some general tips for getting the best experience with this course!
- I speak at a steady, deliberate pace, feel free to speed up the videos! (Check for a speed icon on bottom tab)

Django Bootcamp

- If a video ever appears blurry make sure to check that you are viewing the video in HD.
- Any technical platform issues? Please contact support@udemy.com

Django Bootcamp

- The course is self-paced and you get lifetime access to the materials, including any updates.
- Upon completion of the course you can unlock a certificate for your LinkedIn profile. (Check FAQ lecture)

How to get the course materials!

How to get the course materials

- You can download all files as a .zip from this lecture, the FAQ lecture, or the Installation lecture (it is the same .zip).
- Future additions to the course we get their own .zip file in the relevant section and I will re-upload an updated .zip.

How to approach the course!

Django Bootcamp

- The course is divided into sections that lead into each other.
- Each section can be visited independent of the others, but assumes knowledge of all concepts covered in previous lectures!

Django Bootcamp

- As a general curriculum:
 - HTML, CSS, and Javascript
 - DOM and jQuery
 - Python
 - Django and SQL
 - Website Clones

Django Bootcamp

- We don't assume ANY previous knowledge.
- You can take this course even if you have zero programming experience!
- If you have experience, you may want to read through the code notes first!

Django Bootcamp

- Beginners should follow through the course in order.
- More experienced developers should visit the curriculum page and decide what the best starting point for them is (be honest with yourself!)

How to get help during the course!

How to get help!

- Steps you should take to get help:
 - Search Google and StackOverflow.
 - Search the FAQ lecture.
 - Search the QA forums for posts.
 - Post a new question on QA forums.
 - Include what you've tried, your code, as much info as possible!

How to get help!

- Useful ways to share your code:
 - Codepen
 - Codepad
 - A gist on Github
 - A screenshot

How to get help!

- QA Forums General Info:
- Replies can be expected within 24 hours.
- Other students reply often!
- You may just get a quick link reply.
- Still confused? Just continue the thread.
- Remember to say Thank You!

- Final Note:
- There are many ways to program, that includes choice of IDE, styling, etc.
- Don't feel locked into the choices made in this course, feel free to explore other options, and share them as well!

Thank you!

Setup and Installation

Let's get you set-up!

Django Bootcamp

- There are many options for choosing your Development Environment and your browser!
- We will be using the Atom Text Editor and Google Chrome for this course.

Django Bootcamp

- If you are very experienced with another IDE feel free to use it, although I still highly recommend trying out Atom.
- For a browser choice, please use Chrome, it is by far the most popular choice for Web Developers!

Django Bootcamp

- In this lecture we will show you where to install Atom Text Editor from and give you a quick tour of it!
- Let's get started, go to Google in your browser.
